Title	Capital Line Dairy Weaners	ID	NOR98602
Agent	Don McKenzie	Client	
Location	Northland		
Description	They don't come to the market often, a complete line of autumn born dairy replacement weaners, (weaned three days), from a herd that has been in the one family for over 50 years. They are surplus cattle because the milking platform they were to be farmed on is being reduced in area. Part of a 900 cow split calving herd farmed on a challenging heavy clay Northland farm with a Kikuyu dominant pasture, the potential for these heifers to thrive is huge. There is the opportunity to maintain their organic certification, the property has been organic certified since 2008.
